## IMPORTANT INFORMATION CONCERNING THE INFLUENZA (FLU) VACCINE

The vaccine will not give you because it is made from killed viruses. Today flu vaccine causes fewer side effects than those used in the past. One shot will protect most people from the flu during this flu season however either a second shot or a different dosage may be required for person's less than 25 years of age.

**POSSIBLE SIDE EFFECTS:** most people will not have side effects from the vaccine however' tenderness at the side of shot may occur and last for several days.

Some people may experience Fever, Chills, Headaches or Muscle aches within the first 48 hours.

Individuals may still get the (FLU) they usually have less severe symptoms.

### SPECIAL PRECAUTIONS:

As with any vaccine or drug the possibility of severe or potentially fatal reaction does exist. Flu vaccine has rarely been associated with severe or fatal reactions in some instances people receiving the flu vaccine have allergic reactions. You should note the following precautions very carefully.

1. People with allergic reactions to chicken or eggs should receive the only under special medical supervision.
2. People with fever should delay getting vaccinated until the fever is gone.
3. People who receive another type of vaccine in the past 14 days should consult a physician before getting the flu vaccine.

### IF YOU HAVE ANY QUESTION REGARDING THE FLU VACCINE PLEASE ASK MY NURSE.

I have read and full understand the above information concerning the benefits, risks and the special precautions of getting the flu vaccine. I have the opportunity to ask question and receive answer about the flu vaccine I request that the flu shot be given to me.
